

Activity Sheet

Dressing Room - Multiplication

Objective: To solve multiplication problems using a written method (e.g., long multiplication)

Player A earns £1350 per week

Player B earns £6800 per month

Player C earns £210 per day

Player D earns £71,200 per year

Task 1 – Using the information above to answer the questions below. Remember to show your workings.

- 1) How much does player A earn in a month?
- 2) How much does player C earn in a week?
- 3) How much does player B earn in a year?

Extra Time challenge – Which player earns the most in a year?
